## **New Particle Counter from PMS**

### **HandiLaz Mini Handheld Particle Counter**

Particle Measuring Systems introduces the HandiLaz Mini, an ergonomically designed, simple-to-use handheld that counts particles as small as 0.3 microns. Designed to be the most cost-effective quality handheld on the market, it retains the reliability and accuracy you count on from Particle Measuring Systems.

This counter weighs only 680g and features easy data transfer to Excel, making it accessible to all users. Particle measurements are made in seconds and up to 8000 samples can be stored.

Particle Measuring Systems has over 33 years as the industry leader in particle monitoring and microcontamination control. Particle Measuring Systems combines high-performance instrumentation with unrivaled application expertise to solve the problems of pharmaceutical, semiconductor, and other high tech manufacturers.
